Ans. Q.1. (c) Methods of Note issue

Both the principle of Note issue mentioned above have serious defects. The monetary extents by coordinating the advantages of both the principles have evolved various system.

1) Fixed fiduciary system :- under this system, a fixed amount is laid down by law which need to be covered by government securities. Notes issued in excess of this amount must be fully backed by gold. England adopted this system in 1844.

2) Proportional Reserve system :- under this system, the central bank is to keep a certain ~~replaced~~ percentage of the total notes issue in gold. There is to covered by sound government securities, trade bills etc.

Qns 1. C# is a object-oriented programming language. C# is a design code execution of the program. C# is a syntax are similar like C, C++ & C# are designed coded language. It created by microsoft that runs on the .net framework. C# has roots from the C family, & the language is close to other popular language like C++ & java.

B. C# programs are organised using namespaces. Namespaces are used both as an "internal" organization system for a program, & as an "external" organization system - a way of pressing program elements that are exposed to other programs. Namespaces is a keyword directly uniquely identifies one files or subdirectory.

C. C# if else statement are used to check the exactitude of a condition, based on which a code execute its next step. Similar to all other programming language in C# also the "if else statement" is used
